

The Mask

Masks are all about communicating through the wearable image of a face. We all wear mask, in fact, we may even wear several masks! This all depends on the social relationship or setting. For example, you may wear a different mask when you are with your friends, at a party, or when you are with an adult (your teacher or your parents).

Sometimes we use the mask as a protection, and other times we use the mask to hide (conceal) something about our real selves that maybe we are scared or not ready to show those around us.

Reflection: YouTube- *Identity Short Film*

"How do you think others see you?"

"How you really feel inside?"

"What does it mean to you to wear a mask?"
