

## Musicart Project

How does music allow humans to express their emotions? This is the question at the root of St. Mary's Elementary school students' exploration. They will look into music's different angles and emotions expressed by musical artists.

Throughout the year, all 320 students will research actively in hopes of better understanding the impact that music has had on humans across Time. They will create a multimedia show presented at Théâtre de la Ville, Salle Pratt and Whitney in Longueuil.

During this celebration, the students will be presenting the result of their research through dance, singing, video clip production featuring their art work on music composed by the greatest musicians in History.

As well as the pedagogical aspect, this project will put in light our students 'passion as a motor to a strong school community open on the world. Using arts, we are giving the students an opportunity to develop a strong sense of belonging to their school, thus preventing drop out by involving everyone in their community. We invite you all to our celebration on June 12th 2014.
